Synthetic Grass Treatment Concentrate

Compilation Date: 29 August 2017

Issue Date: 20th June 2022

Revision No: 2.1

Page 1

1. Chemical Product and Company Identification

Product Name Other Means of Identification

Synthetic Grass Treatment Concentrate

2lt: 05-365

Product Code Product Use

Cleaning and deodourising surfaces. Product can be diluted up to

20 to 1 with water. This product is not an environmental hazard

when diluted.

Supplier **ABN Mail Address** Solo Pak Pty Ltd 29 076 652 269

PO Box 67, Brisbane Markets QLD, 4106

Email

sales@solopak.com.au

Telephone:

1300 307 755

Emergency Telephone: Poisons Information Centre (National) 131126

Hazards Identification

Classification of the substance or mixture

HAZARDOUS CHEMICAL. NON-DANGEROUS GOODS. According to the WHS Regulations and the ADG Code.

Poisons Schedule None

GHS Classification

Skin corrosion/irritation(Category 2)

Serious eye damage/eye irritation (Category 2A)

GHS Label Elements

SIGNAL WORD

Hazard Statement(s)

Causes mild skin irritation H316 H319 Causes serious eye irritation.

Prevention(s)

P280 Wear protective gloves/protective clothing/eye protection/face

protection

Wash exposed skin thoroughly after handling. P260

Do not eat, drink or smoke when using this product. P270

Page 1 of 8 Synthetic Grass Treatment Concentrate SDS

Version 2.1 Created 20th July 2021

Synthetic Grass Treatment Concentrate

Avoid release to the environment.

Read the SDS before using this product.

Response

P330 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting P362 Take off contaminated clothing and wash before reuse. P305+P351+P338

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue

P337+P313 If eye irritation persists: Get medical advice / attention. P302+P352 IF ON SKIN: Wash with plenty of soap and water. P301+P312 Call POISON CENTER or doctor if you feel unwell. P332+P313 If skin irritation occurs, get medical advice/attention.

P391 Collect spillage

Storage

Not applicable

Disposal

P501 Dispose of contents/container in accordance with

local/regional/national/international regulations.

3. Composition/Information on Ingredients

(Listed when present at 1% or greater, carcinogens at 0.1% or greater)

Chemical Name	CAS Registry Number	% Weight	Hazard Information
Poly [oxyethylene (dimethyliminio) ethylene - (dimethyliminio)ethyl ene dichloride]	31075-24-8	<10	H302: Acute Toxicity Oral Category 4 H316: Causes mild skin irritation. H320: Causes eye irritation. H400: Aquatic Toxicity Acute Category 1
Didecyl Dimethylammonium Chloride	7173-51-5	<5	H301: Toxic if swallowed H314: Causes severe skin burns and eye damage H318: Serious eye damage Category 1
Polyoxyethylene C12C14 acid methyl ester	Proprietary	<10	H303: May be harmful if swallowed. H316: Causes mild skin irritation. H319: Causes serious eye irritation.
Non hazardous ingredients	Mixture	<5	None
Water	7732-18-5	To 100	None

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak "is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

4. First Aid Measures

For Advice contact a Poisons Information Centre (phone eg. Australia 131126: New Zealand 0 800 764 766) or a Doctor.

General	For advice, contact a Poisons Information Centre (Australia 13 11 26) or a doctor. If swallowed, do NOT induce vomiting. Immediately give a glass of water.			
Inhalation	If fumes, aerosols or combustion products are inhaled remove from contaminated area. Other measures are usually unnecessary.			
Skin	If skin contact occurs: Immediately remove all contaminated clothing, including footwear.			
	Flush skin and hair with running water (and soap if available).			
	Seek medical attention in event of irritation.			
Eyes	If this product comes in contact with the eyes:			
	Wash out immediately with fresh running water.			
	Ensure complete irrigation of the eye by keeping eyelids			

Ingestion

Synthetic Grass Treatment Concentrate

apart and away from eye and moving the eyelids by occasionally

lifting the upper and lower lids.

Seek medical attention without delay; if pain persists or

recurs seek medical attention.

Removal of contact lenses after an eye injury should only be

undertaken by skilled personnel.

If swallowed do NOT induce vomiting.

If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway

prevent aspiration.

Observe the patient carefully.

Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.

Seek medical advice.

Symptoms Caused by Prolonged skin contact may result in dermatitis or reddening

of the skin.

Indication of any immediate medical attention and special treatment needed Treat symptomatically.

5. Fire Fighting Measures

Fire and explosion hazards There are no specific risks for fire/explosion for this chemical. It is non-

Suitable extinguishing substances

Unsuitable extinguishing

substances

Products of combustion

Protective equipment

flammable. Use carbon dioxide or dry chemical for small fires. Use foam or water fog

for large fires. Unknown.

Carbon dioxide, and if combustion is incomplete, carbon monoxide and

smoke. Water.

Self-contained breathing apparatus. Safety boots, non-flammable

overalls, gloves, hat and eye protection.

6. Accidental Release Measures

Emergency procedures In the event of spillage alert the fire brigade to location and give brief

description of hazard.

Wear protective equipment to prevent skin, eye and respiratory exposure.

Clear area of any unprotected personnel.

Contain using sand, earth or vermiculite.

Prevent by whatever means possible any spillage from entering drains, sewers, or water courses. (If this occurs contact your regional council

immediately). Clean-up method

Use absorbent (soil, sand or other inert material). Rags are not recommended for the clean-up of spills, as they may create fire or

environmental hazard.

Disposal Collect and seal in properly labeled containers or drums for disposal. If

contamination of

crops, sewers or waterways has occurred advise local emergency services.

Synthetic Grass Treatment Concentrate

Mop up and collect recoverable material into labeled containers for recycling or salvage.

Recycle containers wherever possible. This material may be suitable for

approved landfill.

Dispose of only in accord with all regulations.

Precautions Wear protective equipment to prevent skin and eye contamination and the

inhalation of vapour.

Work up wind or increase ventilation.

7. Handling and storage

Storage: Avoid storage of harmful substances with food.

Store out of reach of children.

Containers should be kept closed in order to minimise contamination.

Store in a cool place.

Avoid contact with incompatible substances as listed in Section 10. Containers (and outer packaging) must bear the prescribed labelling.

Handling: Keep exposure to a minimum, and minimise the quantities kept in work

areas. See section 8 with regard to personal protective equipment requirements. Avoid skin and eye contact and inhalation of vapour, mist or

aerosols.

8. Exposure controls /personal protection

Workplace Exposure Standards

An Exposure Standard (ES) for the mixture has not been established. Below are the exposure standards for the ingredients that are listed in the NOHSC: 1003.

Emergency Limits

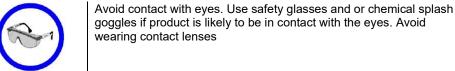

Ingredient	Material name	TEEL-1	TEEL-2	TEEL-3
benzyl C12-16- alkyldimethylammoniumc hloride	Quaternary ammonium compounds, benzyl-C12-C16-alkyldimethyl, chlorides	1.3 mg/m3	14 mg/m3	84 mg/m3

Engineering Controls

In industrial situations, concentration values below the ES value must be maintained. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe airborne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

Personal Protective Equipment

Eyes

Synthetic Grass Treatment Concentrate

Skin

Avoid repeated or prolonged skin contact. If discomfort is felt (e.g., if pre-existing conditions exist, such as dermatitis, cuts or sensitive skin), gloves may be helpful. If you suffer from dermatitis type skin conditions, use impervious gloves. Replace gloves frequently and check for tears or holes.

Respiratory

A respirator with an organic vapour cartridge when airborne concentrations approach the ES (section 8). If using a respirator, ensure that the cartridges are correct for the potential air contamination

ES Additional Information | No additional information

9. Physical and chemical properties

Physical Description & Clear colourless mobile liquid

colour:
Odour:
Cut grass odour

Boiling Point: Approximately 100°C at 100kPa.

Freezing/Melting Point: Lower than 0° C. Volatiles: Water component.

Vapour Pressure: 2.37 kPa at 20°C (water vapour pressure).

Vapour Density: No data.
Specific Gravity: 1.02

Water Solubility: Completely soluble in water. As supplied: 5.4 +/- 0.3

Volatility:
Odour Threshold:
Evaporation Rate:
Coeff Oil/water

No data
No data
No data

distribution:

Autoignition temp: Does not burn.

10. Stability and Reactivity

Chemical stability Stable

Conditions to avoid Do not mix with oxidising agents (Class 5)

Incompatible materials Not to be loaded with dangerous when wet substances (Class 4.3),

oxidising agents (Class 5), cyanides (Class 6), strong acids (Class 8)

or foodstuffs.

Hazardous Upon combustion oxides of carbon (CO, COX)

decomposition

Hazardous reactions Oxidising agents (Class 5)

11. Toxicological information

SYMPTOMS OF EXPOSURE

Synthetic Grass Treatment Concentrate

Swallowed: Harmful liable to cause nausea and vomiting. May cause tissue

damage to mouth and gullet.

Eye: Severe irritant. May cause permanent injury and impairment of vision. Skin: Irritant. May be severe with sensitive individuals or after repeated

contact. Prolonged or repeated exposure may lead to dermatitis. No

specific data available on skin adsorption.

Inhalation: Not normally considered an inhalation hazard. Aspiration (breathing

in) of liquid, spray mist liable to cause severe irritation and damage to

respiratory tract.

12. Ecological information

Ecotoxicity This product, while biodegradable at high dilution is toxic to marine

and aquatic organisms. Ensure all spills are contained and recovered

into suitable drums.

Quaternary ammonium
